AUTOMATED SOC INCIDENT RESPONSE & DFIR REPORT

Wazuh SIEM/SOAR Pipeline • Automated Forensics Engine

SEVERITY LEVEL 10 CRITICAL

Generated: 2026-09-13 17:25:42

1. Incident Overview & SIEM Detection Metadata

Incident ID:	INC-20260913-7C1B03	**Detection Rule ID:**	**100051** (Level 10)
Detection Time:	2026-09-13 17:25:42	**SIEM Manager:**	Kali Linux (192.168.31.68, v4.14.7)
Rule Description:	Windows Multiple Failed Logins Detected (Brute Force Attack Pattern).	**Correlation Logic:**	5 failed logons (Evt 4625) in 120s by same user

2. Targeted Asset & Identity Context

Endpoint Hostname:	**DESKTOP-BJ2IO2A**	**Agent ID:**	001
Targeted Account:	**Administrator**	**Logon Type:**	3 (Network - SMB/File Share)
Source Network IP:	192.168.31.105	**Audit Policy:**	auditpol Logon Failure (Active)

3. MITRE ATT&CK;® Classification

MITRE Tactic:	**Credential Access (TA0006)**	**Technique ID:**	**T1110.001**
Technique Name:	Brute Force: Password Guessing (T1110.001)	**Detection Confidence:**	**HIGH (100% Correlation)**

4. Forensic Timeline & Evidence Stream (Windows Event ID 4625)

Event ID	Timestamp	Target User	Sub-Status Code	Source IP
4625	2026-09-13 17:23:52	Administrator	0xC000006A - STATUS_WRONG_PASSWORD (Bad Password)	192.168.31.105
4625	2026-09-13 17:24:12	Administrator	0xC000006A - STATUS_WRONG_PASSWORD (Bad Password)	192.168.31.105
4625	2026-09-13 17:24:32	Administrator	0xC000006A - STATUS_WRONG_PASSWORD (Bad Password)	192.168.31.105
4625	2026-09-13 17:24:52	Administrator	0xC000006A - STATUS_WRONG_PASSWORD (Bad Password)	192.168.31.105
4625	2026-09-13 17:25:12	Administrator	0xC000006A - STATUS_WRONG_PASSWORD (Bad Password)	192.168.31.105

5. Automated Containment & DFIR Action Plan

Step	Action Item & Technical Guidance	Status
01	[CONTAINMENT] Apply host isolation to Endpoint 'DESKTOP-BJ2IO2A' (ID 001) via Wazuh Active Response.	**RECOMMENDED**
02	[IDENTITY] Temporarily lock account 'Administrator' and revoke active Kerberos/NTLM tickets.	**RECOMMENDED**
03	[NETWORK] Block or rate-limit source address '192.168.31.105' at edge firewall.	**RECOMMENDED**
04	[FORENSICS] Export Security.evtx from endpoint and audit for any subsequent successful logons (Event ID 4624).	**RECOMMENDED**
05	[INVESTIGATION] Triage active network sockets (netstat -ano) and parent process trees for unauthorized tooling.	**RECOMMENDED**
06	[REMEDIATION] Require immediate password rotation and enforce Multi-Factor Authentication (MFA).	**RECOMMENDED**

DFIR Lead / SOC Analyst:	Automated Response Agent (Antigravity SOAR Engine)	**Classification:**	**CONFIDENTIAL - SOC TIER 2**
Evidence Hash:	SHA256-INC202609137C1B03A9F2	**Review Status:**	**VERIFIED SIGNED**
